Dear Uniontown Area High School Community:

The Uniontown Area School District has partnered with Nickman's Drug to provide a centralized testing location for our district community.

Regular testing can promptly identify and isolate COVID-19 infected people, including those with or without symptoms, so that measures can be taken to prevent further transmission. For schools that do not have the resources to test for COVID-19 on site, the CDC recommends collaborating with community-based testing sites, such as Nickman's Drug for a centralized testing location offered by the school district.

Signature Diagnostics Lab is improving access to COVID-19 testing for schools with the help of our community-based testing partners throughout the greater Pittsburgh region. For schools that do not have the resources to test for COVID-19 on site, the CDC recommends collaborating with community-based testing sites, such as Nickman's Drug.

It is recommended to use community testing sites when:

- An individual has recently been exposed to someone with COVID-19
- There is reason to suspect an individual may be infected, or is experiencing symptoms.

Nickman's Drug is a community testing location near our school district offering Signature Diagnostics PCR saliva-based testing. They are located at 3 Nickman's Plaza Lemont Furnace, PA 15456.

For anyone planning on being tested at this location, please be aware that you will need your driver's license and health insurance information. All other needed information will be collected by the pharmacy at the time of your testing. Testing results are sent directly to the individual (or parent) being tested. The results do not get sent back to Nickman's Drug nor the school district.
